INTRODUCTION

This report presents a wide range of socio-economic data for each of the 57 provincial electoral constituencies in Manitoba. The presented data was provided by Manitobans during the 1986 Census. The Manitoba Bureau of Statistics developed the special geographic referencing required to produce these provincial electoral district profiles.

This report consists of 11 tables of characteristics, for each of the provincial electoral districts, which are presented alphabetically, six to a page. All 11 tables of characteristics are presented for each set of six provincial electoral constituencies, before going on to the next set. The Manitoba total characteristics are presented with the last set of provincial elactoral constituencies.

Data presented includes information on population characteristics, families, housing stock, education, labour force activity and income.

The Manitoba Bureau of Statistics has available additional information at the provincial electoral costituency level. This custom information can be developed on a cost recovery basis.

For further information, please contact Wilf Falk at 945-2988.
